11016-1925 1400/9/28 تاریخ:

نام آزمایشگاه: پاتوبیولوژی آزاد

دوره: عمومی 1400-2

شماره نمونه: 5.221 | 002220

دانشگاه: علوم پزشکی البرز

استان: البرز

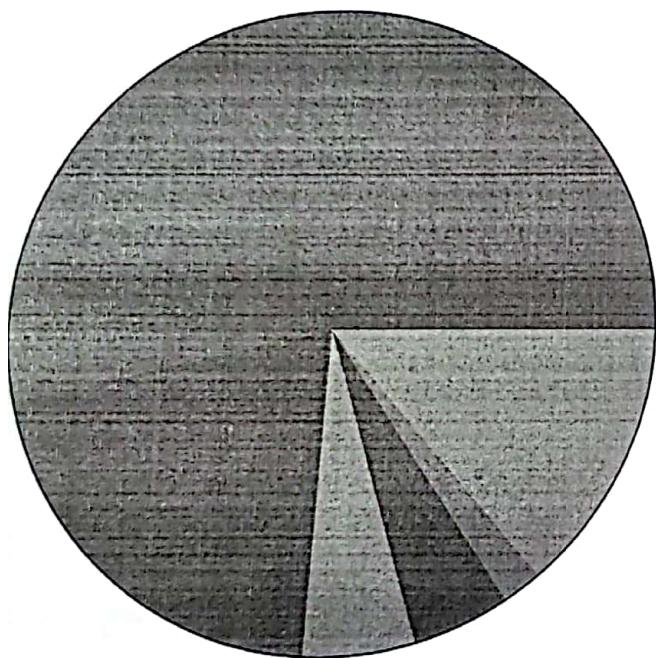

تشخیص آزمایشگاه
Myelodysplastic/Myeloproliferative disorders

تشخیص مورد انتظار

؟!

نمودار آماری تشخیص

- N.A ~ 54 %
- Myelodysplastic/Myeloproliferative disorders ~ 21 %
- Aplastic anemia ~ 5 %
- Hairy Cell Leukemia (HCL) ~ 5 %
- Chronic Lymphocytic Leukemia (CLL) ~ 2 %
- Different diagnosis ~ 14 %

Interpretation / Diagnosis: Cytomorphology & immunophenotyping of PB reveals presence of Blast (3%) which are $CD13^{pos}$ $CD33^{pos}$ $CD34^{bright}$ $CD38^{pos}$ $CD117^{pos}$. Normal B & T-cells were present. BM cytomorphology & immunophenotyping for definitive diagnosis or rule out of Acute Myeloid Leukemia and MDS recommended.

Leukemic Blast / Cells

Marker	%	Marker	%
B-Lymphoid		Myeloid	
CD10	<1	CD45	100
CD19	9	CD13	12
CD20	9	CD14	3

Immunophenotype:

Immunophenotyping of PB with gating (47%) on lymphocyte region. These cells have small size (based on forward-scatter signal). Normal B & T-cells were present (CD2, CD3, CD7, CD19, CD20).

PB smear; Blast: 3%.
